64. Write the numerals in English. 87, 13, 705, 1922, 30957, 48ci
65. Translate: A steam locomotive is a locomotive whose primary power source is a steam engine. The most common form of steam locomotive also contains a boiler to generate the steam used by the engine. The water in the boiler is heated by burning combustible material – usually coal, wood, or oil – to produce steam.
66. Translate: Internal combustion locomotives use an internal combustion engine, connected to the driving wheels by a transmission. Typically they keep the engine running at a near-constant speed whether the locomotive is stationary or moving. Internal combustion locomotives are categorised by their fuel type and sub-categorised by their transmission type.
67. Translate: Petrol-electric locomotives are petrol locomotives, A gas turbine locomotive is an internal combustion engine.
